Instructional Technology for Language Learning
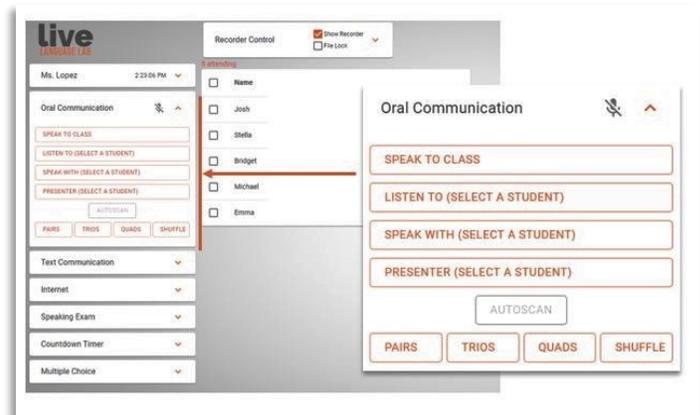

live language lab ON-DEMAND

LIVE - ON-DEMAND - SYNCHRONOUS - LANGUAGE LAB - IN SCHOOL - AT HOME

LIVE is a browser-based language lab application that is available on-demand for language teaching in-person, on-line, and in hybrid models. Ideal for any language, and at any level.

An application designed to seamlessly integrate into 1:1 programs - giving students more opportunity to develop target language communication skills to build proficiency.

ENGAGE STUDENTS IN ACTIVE LEARNING

- Access LIVE from a web-browser; simple log in for both teachers and students in school and at home.

- Communicate with all students, individuals or pairs (groups) working together.

- Easily select partners or groups to increase target language communication and collaborative learning.

- Keep students engaged and on task with directed web resources.

- Monitor students as they work and provide real-time feedback.

- Pace and guide in class activities with easy control of students' virtual recorders.

- Simply collect student recordings for review and assessment.

- Use text tools to give direction or for class collaboration.

- Prep for and administer standardized speaking exams.

SANS Instructional Technology for Language Learning | **live** language lab ON-DEMAND
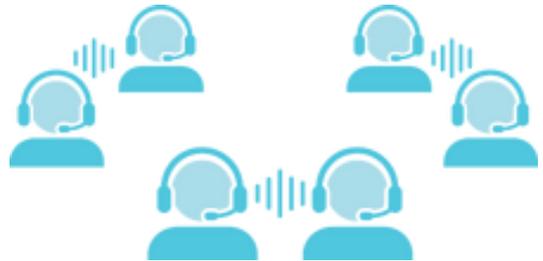

The productivity tools in LIVE enable teachers to efficiently manage class activity giving students more time to develop interpersonal, interpretive, and presentational speaking skills.

Research indicates that more time spent using the target language helps build student confidence and proficiency.
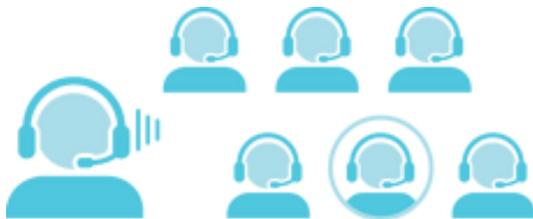

Maximize class time

When teachers and students log-in to a LIVE class, synchronous communication begins immediately.
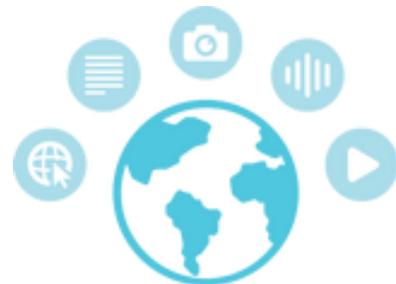

Boost student production

Quickly partner students for speaking practice to maximize L2 communication.

Individual attention

Easily monitor students as they work to see how they are progressing and to provide immediate help to anyone that may need it.

Authentic content

Enrich curriculum by integrating authentic target language materials - audio & video content and web links.
